

registry::RegistrySuper
::Register

```
graph RL; FakeChan[FakeChan::FakeChan] --> RegistrySuper[registry::RegistrySuper::Register];
```

The diagram illustrates a relationship between two classes. On the left, a gray rectangular box contains the text 'registry::RegistrySuper' on the top line and '::Register' on the bottom line. On the right, a white rectangular box contains the text 'FakeChan::FakeChan'. A dark blue arrow points from the right side of the 'FakeChan::FakeChan' box to the right side of the 'registry::RegistrySuper::Register' box, indicating that 'FakeChan::FakeChan' inherits from or is associated with 'registry::RegistrySuper::Register'.
