

std::exception

```
classDiagram
    class std_exception["std::exception"]
    class registry_sqlite3_open_failed["registry::SQLite3OpenFailed"]
    registry_sqlite3_open_failed --|> std_exception
```

The diagram illustrates an inheritance relationship. At the top is a white rectangular box representing the 'std::exception' class, divided into three horizontal sections. Below it is a gray rectangular box representing the 'registry::SQLite3OpenFailed' class, also divided into three horizontal sections. A blue arrow with an open triangular head points from the top section of the gray box to the bottom section of the white box, indicating that 'registry::SQLite3OpenFailed' inherits from 'std::exception'.

registry::SQLite3OpenFailed
